

DAILY DEFENCE FLUID BROAD SPECTRUM SPF50

CORRECT + BRIGHTEN

ectoin shield complex® – vit C ester –
niacinamide

50 ml | 1,7 fl.oz

GROUP
FACE F | 6750

PRODUCT

This advanced daily mineral SPF 50 fluid is designed for skin affected by pigmentation, sun damage, uneven tone or a loss of luminosity. The formula delivers high, broad-spectrum protection against UVA, UVB and blue light, while defending the skin against pollution and oxidative stress — two key contributors to pigment aggravation.

Created as a daily 360° skin shield, this fluid helps protect the skin 365 days a year from triggers that can initiate or deepen pigmentation. The ultra-light, subtly tinted texture absorbs instantly, evens out the complexion and leaves a smooth, refined finish with no white cast. Powered by a combination of mineral filters, innovative pigment-correcting molecules and powerful antioxidants, this fluid helps gradually brighten, even and restore the skin's natural radiance.

BEAUTY BENEFITS

This daily mineral fluid targets both the prevention and correction of pigmentation. The formula helps reduce the appearance of existing discolouration, prevents pigment worsening caused by daily UV and pollution exposure, and gives the complexion a brighter, more even look.

The subtle tint blends instantly into the skin, providing gentle evening — perfect for everyday wear, on its own or under makeup. Ideal for skin with pigmentation spots, sun damage, uneven tone or dullness, this mineral fluid helps correct discolouration, supports luminosity and helps prevent new pigment formation through daily protection against light and pollution stress. Non-comedogenic, suitable for daily use and designed for year-round wear.

APPLICATION

Shake well before use to ensure the mineral filters are evenly dispersed. Apply an even layer to the face and neck every morning as the final step in your skincare routine. The airy, softly tinted texture absorbs instantly and forms a flexible, non-greasy protective veil.

Apply before sun exposure. Reapply regularly to maintain optimal protection, especially after sweating or swimming. Avoid prolonged sun exposure during peak hours. Keep babies and young children out of direct sunlight. Avoid contact with eyes, mucous membranes and open wounds. Not suitable for children under 3 years. Not for ingestion.

BOTANICAL ACTIVES

Ectoin Shield Complex®: The Ectoin Shield Complex® forms the foundation of all Likami Daily Defence Fluids. Rather than a collection of separate ingredients, this complex is an adaptive, synergistic protection system that brings together natural biotechnology and advanced mineral defence. It acts as a living, responsive mechanism that continuously adapts to the skin's needs while enhancing the performance of every active ingredient in the formula.

At its core is Ectoin, a biomimetic extremolyte that enables micro-organisms to survive extreme heat, UV exposure and dehydration. On the skin, Ectoin creates a molecular protective shield that stabilises cell membranes, reduces oxidative stress, calms micro-inflammation and limits transepidermal water loss. The result is a stronger barrier, long-lasting hydration and skin that feels more resilient and less reactive.

The complex is further supported by aloe vera (Aloe Barbadensis Leaf Juice), which hydrates, soothes and helps maintain formula stability, and by vitamin E (Tocopherol), a powerful antioxidant that neutralises free radicals and supports the effectiveness of the mineral filters.

What makes the Ectoin Shield Complex® truly unique is its direct synergy with the 100% mineral filters — Zinc Oxide and Titanium Dioxide. Thanks to high-tech dispersion technology, these filters are distributed extremely evenly, making them far more transparent than traditional mineral SPF's and creating a refined, lightweight texture with no white cast. Together, they deliver highly photostable protection against UVA, UVB and blue light, as well as pollution-induced oxidative stress. In synergy with Ectoin, this results in a modern, intelligent form of daily mineral protection that doesn't sit on top of the skin, but moves with it.

Vitamin C-ester (Tetrahexyldecyl Ascorbate): THD Ascorbate is an advanced, oil-soluble form of vitamin C with high stability and optimal skin penetration. It helps inhibit melanin production, supports collagen synthesis and protects against free radicals. Thanks to its gentle yet effective action, this form is particularly well suited for sensitive skin types seeking powerful brightening and tone-evening benefits.

Bisabolol: Bisabolol, derived from chamomile, is known for its soothing and anti-inflammatory properties. It helps reduce redness and improves skin comfort, especially in dry or sensitive skin that reacts easily to external stressors.

Niacinamide (Vitamine B3): Niacinamide is a versatile tone-refining ingredient that helps reduce the appearance of hyperpigmentation by slowing the transfer of melanin to the upper layers of the skin. It also strengthens the skin barrier, improves elasticity, refines the look of pores and helps limit inflammation-related pigmentation. The result is a more even, calmer and balanced-looking complexion.

Tranexamic Acid (Tranexamic Acid): Tranexamic acid is a modern, highly effective molecule for targeting pigmentation. It acts on inflammatory pathways that amplify pigment formation, helping to reduce melasma, sun spots and post-inflammatory hyperpigmentation. It works synergistically with niacinamide and vitamin C as part of a refining, tone-evening routine.

Raspberry Seed Oil (Rubus Idaeus Seed Oil): Raspberry seed oil is rich in natural antioxidants, including tocopherols, which help protect the skin from oxidative stress. It softens the skin surface, supports elasticity and helps the skin feel calmer and more comfortable, even when exposed to daily stressors.

Licorice Root Extract (Glycyrrhiza Glabra Root Extract): Licorice root is a botanical tone brightener rich in glabridin, a natural tyrosinase inhibitor. The extract helps reduce discolouration, calms low-grade inflammation and supports skin clarity, allowing pigment-correcting actives to work more effectively.

INGREDIENTS

Caprylic/capric Triglyceride, Titanium Dioxide, Aloe barbadensis Leaf Juice**, Coco-caprylate, Decyl Oleate, Glycerin**, Zinc Oxide, Aluminum Hydroxide, Polyglyceryl-2 Dipolyhydroxystearate, Stearic Acid, Polyglyceryl-3 Diisostearate, Maltodextrin, Tetrahexyldecyl Ascorbate, Aqua, Cetearyl Olivat, Tranexamic Acid, Zea Mays Starch, Glyceryl Caprylate, Sorbitan Olivat, Ectoin, Cymbopogon martini Herb Oil, Xanthan Gum, Glyceryl Undecylenate, Glycine Soja Oil, Tocopherol, Niacinamide, Rubus idaeus Seed Oil**, Bisabolol, Phytic Acid, Glycyrrhiza glabra Root Extract**, Citric Acid, Mannitol, Phosphatidylcholine, Pentylen Glycol, Polyglyceryl-10 Laurate, Beta-Sitosterol, Benzyl Alcohol, Potassium Sorbate, Sodium Benzoate, Geraniol*, Geranyl Acetate*, Farnesol*, Linalool*, Beta-Caryophyllene*, Citral*, Limonene*, CI 77492, CI77491, CI 77499. (from 100% natural essential oils / ** certified organic / *** no nanoparticles)
