

DEODORANT GEL

AHAs – horsetail – aloe vera

100 ml | 3,4 fl.oz

GROUP
BATH & BODY BB | 141100

PRODUCT

The innovative formula of our Deodorant Gel is the culmination of extensive scientific research, augmented by the potency of natural active ingredients. This gel is crafted with a 5% natural AHA complex, adept at neutralising odours and optimising the skin's pH balance for a healthy microbial flora. The formula is specifically designed to honour and bolster the natural skin barrier, whilst adeptly addressing perspiration odour without clogging pores. Free from sodium bicarbonate, aluminium, alcohol, and synthetic fragrances, the product offers a safe and effective solution for daily use. It ensures prolonged freshness and is suitable for sensitive skin.

BEAUTY BENEFITS

Crafted to nourish and pamper the skin, while tackling specific issues like hyperpigmentation and reducing the appearance of bumps, including ingrown hairs. A meticulously chosen blend of natural AHAs establishes a low pH setting, deterring odour-producing bacteria. Meanwhile, gentle exfoliation from these AHAs enhances skin tone and texture. Infused with moisturising aloe vera and calming arnica extract, our formula ensures a comfortable underarm sensation. Emphasising both skin health and odour management, our Deodorant Gel stands as a cornerstone of daily skin care, aiming to maintain your skin feeling refreshed, smooth, and well looked after.

APPLICATION

For optimal results, apply our Deodorant Gel to clean, dry underarms. A thin layer is all that's needed for all-day protection. The formula dries quickly and leaves no residue, allowing you to dress immediately after application. Daily use encourages healthier skin and more effective body odour control.

BOTANICAL ACTIVES

Aloe Vera (Aloe Barbadensis Leaf Juice): Renowned for its hydrating, soothing, and refreshing qualities. Aloe vera promotes new cell production, supports cell regeneration, and penetrates deeply into the skin. It is a potent skin care agent in protective formulas.

Burdock Extract (Arctium Majus Root Extract): Possesses soothing properties and acts to regulate sebum and provide antimicrobial benefits, aiding in promoting a clear and purified complexion.

Alpha Hydroxy Acids (AHAs): These natural AHAs work synergistically to not only neutralise odours by optimising the skin's pH, but also to exfoliate, hydrate, and rejuvenate the skin. Through these specific actions, they contribute to healthy, smooth, and radiant underarm skin.

- Glycolic acid (derived from Saccharum Officinarum Extract):** The smallest molecule among AHAs, renowned for its ability to deeply penetrate the skin. Glycolic acid assists in exfoliating dead skin cells, stimulating cell renewal, and reducing the appearance of fine lines and wrinkles.
- Malic Acid (sourced from Vaccinium Myrtillus Fruit Extract):** Works in conjunction with other AHAs to improve skin texture and even out skin tone. Malic acid is gentler than glycolic acid, making it suitable for sensitive skin types.
- Lactic Acid (derived from Vaccinium Myrtillus Fruit Extract and Citrus Limon Fruit Extract):** Offers gentle exfoliation and is renowned for its hydrating properties. Lactic acid helps to improve skin texture, brighten the skin, and maintain the natural moisture balance.
- Mandelic Acid (derived from Citrus Aurantium Dulcis Fruit Extract and Citrus Limon Fruit Extract):** Possesses larger molecules than glycolic and lactic acids, allowing for less deep penetration and making it gentler on the skin. Mandelic acid is effective in brightening the skin and reducing the visibility of skin aging.

Horsetail (Equisetum Arvense Extract): Rich in minerals, especially silicon, which contributes to collagen synthesis and improves skin structure, making the skin more resilient.

Arnica Extract (Arnica Montana Flower Extract): Offers soothing benefits and helps alleviate irritation in sensitive areas such as the underarms.

Calendula Extract (Calendula Officinalis Flower Extract): Known for its soothing and calming properties, ideal for soothing sensitive skin.

Chamomile Extract (Chamomilla Recutita Flower Extract): Offers soothing benefits, helping to stabilize and soften the skin.

Sunflower Oil (Helianthus Annuus Seed Oil): Rich in tocopherol and antioxidants, this oil provides emollient and softening properties that help restore and protect the skin barrier.

Sage Oil (Salvia Lavandulifolia Seed Oil): Known for its antibacterial properties and helps in refreshing and purifying the skin.

INGREDIENTS

Aloe barbadensis Leaf Juice**, Aqua, Glycerin**, Helianthus Annuus Seed Oil**, Maltodextrin, Zinc Ricinoleate, Propanediol, Vaccinium myrtillus Fruit Extract, Xanthan Gum, Salvia Lavandulifolia Seed Oil, Saccharum Officinarum Extract, Galactoarabinan, Glyceryl Caprylate, Citrus aurantium dulcis Fruit Extract, Citrus limon Fruit Extract**, Glyceryl Undecylenate, Acer saccharum Extract, Chamomilla Recutita Flower Extract**, Calendula officinalis Flower Extract**, Arnica Montana Flower Extract, Equisetum arvense Extract, Arctium majus Root Extract, Citric Acid, Benzyl Alcohol, Potassium Sorbate, Sodium Benzoate, Linalool, Benzyl Cinnamate*, Limonene*, Geraniol*, Benzyl Benzoate*, Benzyl Salicylate*, Citral*, Alpha-Isomethyl Ionone*.
