PRODUCT

The Dream Repair Eye Oil marks a revolutionary development in nighttime eye care, specifically designed to transform the skin around your eyes during your sleep. This luxurious eye oil combines natural potency with the latest scientific insights for unprecedented skin rejuvenation. With its rich and nourishing texture, the oil effectively addresses signs of fatigue and aging. This way, you wake up every morning with visibly fresher and more vibrant skin around the eyes.

BEAUTY BENEFITS

The Dream Repair Eye Oil enriches your skin with antioxidants, omega fatty acids, and phytoestrogens. Antioxidants, present in ingredients like argan oil and pomegranate seed oil, combat oxidative stress. Omega fatty acids, derived from sweet almond oil and grape seed oil, provide deep hydration. Phytoestrogens, for example in pomegranate seed oil, nourish the skin and improve its firmness and radiance. This coordinated collaboration ensures that your skin wakes up with renewed vitality and shine, supported by scientific precision.

APPLICATION

For the best result with the Dream Repair Eye Oil, start your evening routine with a thorough cleansing and toning of the face. For maximum effectiveness, use serums that complement the soothing action of the oil. Begin your skincare ritual by gently rolling the metal applicator of the Dream Repair Eye Oil over the under-eye area, temples, and forehead. Allow the luxurious blend to absorb and enjoy the calming effect. For an enriched experience, apply a small amount to your wrists and take time to inhale the soothing aroma. Conclude the ritual with one of our facial creams and possibly add an oil serum for an extra occlusive effect and a complete skincare experience.

BOTANICAL ACTIVES

Sea Buckthorn Berry Oil (Hippophae Rhamnoides Fruit extract): This berry is a rich source of vitamin C, various B vitamins, vitamin E, lycopene, phytosterols, and numerous phenolic compounds that provide antioxidant benefits. A unique aspect of this fruit extract is its ability to help stabilize elements in the skin that normally break down in the presence of hydrogen peroxide and other types of free radicals. Like other berries, it also has a noticeable calming effect on the skin.

Pomegranate Seed Oil (Punica Granatum seed oil): This extract, derived from the fruit of the pomegranate plant, is rich in antioxidants, polyphenols, and other compounds that can protect and rejuvenate the skin. Pomegranate extract is often used in skincare products as an anti-aging and brightening agent and may also have some anti-inflammatory and antimicrobial effects. What sets pomegranate oil apart is the combination of two antioxidant components in the fruit – punicalagin and Omega 5. Punicalagin is present in the fruit's peel, while Omega 5 is found exclusively in the inner seed. Punicalagin promotes the regeneration of the dermis and Omega 5 rejuvenates the epidermis. Additionally, it is rich in polyphenols and anthocyanins, which fight free radicals and skin aging. It is recommended for dry, devitalized skin, wrinkle treatment, and sensitive skin conditions.

Avocado Oil (Persea Gratissima): Rich in natural minerals, proteins, and vitamins A, B, D, E, H, K, PP. It absorbs quickly and efficiently. It has soothing and nourishing properties, is rich in antioxidants, and helps prevent signs of skin aging.

Grape Seed Oil (Vitis Vinifera Seed Oil): Rich in antioxidants and linoleic acid, it helps balance the skin's moisture content.

Sunflower Seed Oil (Helianthus Annuus Seed Oil): Extracted from the seeds of the sunflower, this oil is rich in fatty acids, antioxidants, and vitamins. Sunflower oil has been shown to have moisturizing and anti-inflammatory effects on the skin, and can help improve the overall texture and appearance of the skin. It is also a non-comedogenic oil, meaning it does not clog pores or contribute to acne.

Sweet Almond Oil (Prunus amygdalus dulcis): Sweet almond oil has softening, restorative, and moisturizing properties. Sweet almonds are known for their high emollient effect. Topical application promotes the suppleness and elasticity of the skin.

Argan Oil (Argania spinosa): Rich in vitamin E and phytosterols, softens and soothes the skin. Phytosterols ensure skin elasticity and thus prevent wrinkles and stretch marks. It contains 80% essential fatty acids, has antioxidant properties, prevents premature aging, and moisturizes, nourishes, and regenerates the skin.

Jobba Oil (Simmondsia Chinensis): In addition to its excellent emollient action that provides deep hydration and softness, it has a unique property essential for deep hydration of the stratum corneum. It forms a non-greasy, protective lipid layer that offers comparable effectiveness to mineral oil.

Geranium Oil (Pelargonium Graveolens Oil): On the skin, this essential oil is calming and restorative. It helps reduce expression lines and can also be used on skin prone to acne.

Vitamin E (Tocopherol): Vitamin E has many properties, but it is especially known as the vitamin of youth and beauty. It is an antioxidant that protects cells against external aggression such as pollution, pesticides, and stress, the main cause of premature aging.

Rosemary (Rosmarinus officinalis leaf extract): Rosemary extract offers significant anti-inflammatory and antibacterial properties thanks to the high concentration of Rosmarinus acid, which is used to treat sensitive and irritated skin. On the other hand, the contents of carnosic acid and carnosol act as antimicrobial agents, offering protection against bacteria. Overall, this extract has remarkable antiseptic and astringent properties.

INGREDIENTS

Prunus amygdalus Dulcis Oil**, Caprylic/capric Triglyceride, Simmondsia chinensis Seed Oil**, Argania spinosa kernel Oil**, Helianthus Annuus Seed Oil, Prunus Armeniaca Kernel Oil, Vitis Vinifera Seed Oil**, Tocopherol, Punica Granatum Seed Oil**, Persea Gratissima oil, Rosmarinus Officinalis Leaf Oil, Hippophae Rhamnoides Fruit Extract**, Pelargonium graveolens Oil, Rosmarinus Officinalis Leaf Extract**, Citronellol*, Geraniol*, Limonene*, Linalool*.
