

# GOODNIGHT RENEWAL CREAM

omega+ – retinol – ceramides

50 ml | 1,7 fl.oz

GROUP  
FACE F | 6450

## PRODUCT

The Goodnight Renewal Cream is a groundbreaking innovation in nighttime skincare, developed to transform your skin while you sleep. This luxurious night cream combines advanced science with natural extracts for profound rejuvenation and hydration. Thanks to its rich and nourishing texture, the cream effectively combats signs of fatigue and aging, ensuring you wake up every morning with visibly fresher and more vibrant skin.

## BEAUTY BENEFITS

The potent formula of the Goodnight Renewal Cream includes high-quality ingredients such as retinol, known for its anti-aging properties, and hyaluronic acid for intensive hydration. Additionally, ceramides strengthen the skin's natural barrier, while aloe vera works to soothe and repair. Argan oil and baobab oil are added to intensely nourish the skin, keeping it supple and resilient. This night cream is more than a skincare product; it forms an essential part of your evening routine and contributes to both a good night's sleep and a healthy, radiant complexion.

## APPLICATION

Enrich your evening routine with our Goodnight Renewal Cream. Begin with a thorough cleansing and toning of your face. After this preparation (and the possible application of serums), apply a small amount of cream to both the face and neck, taking care to avoid the sensitive skin around the eyes. Gently massage the cream in to promote absorption. Throughout the night, the cream works intensively, resulting in a hydrated and healthier-looking skin upon waking. Complete your morning routine with an SPF product for optimal protection and the best results.

## BOTANICAL ACTIVES

**Vitamin A (Retinol):** Retinol is known as the gold standard in the skincare industry as an ingredient for reducing the signs of premature skin aging. It accelerates skin renewal, fades wrinkles, fine lines, and dark spots, and creates firmer, smoother, and more even skin. Additionally, retinol can also help reduce acne by preventing clogged pores caused by dead skin cells.

**Hyaluronic Acid (Sodium Hyaluronate):** This substance attracts and retains moisture in the skin, contributing to hydration and plumping of the skin. It is often referred to as a 'moisture-binding' ingredient.

**Ceramide (Glucosyl Ceramide):** This is a form of ceramide that helps strengthen and restore the skin's natural barrier function, preventing moisture loss and improving skin hydration.

**DMAE (Dimethylaminoethanol Tartrate):** An active ingredient with a molecule that effectively penetrates cells and stimulates collagen synthesis. It provides skin elasticity and firmness and has antioxidant properties. It is also known for reducing under-eye circles and is suitable for all skin types.

**Prickly Pear Oil (Opuntia Ficus-Indica Seed Oil):** This extract is derived from the prickly pear and is rich in antioxidants, vitamins, and minerals that can nourish and protect the skin. Prickly pear extract is often used in skincare products as an anti-inflammatory and moisturizing substance, and may also have some anti-aging and brightening effects on the skin. It can help improve the overall health and appearance of the skin and is suitable for all skin types.

**Hops Extract (Humulus Lupulus Extract):** Derived from the hops plant and is often used in skincare products for its calming and soothing properties. Hops extract contains antioxidants, which help protect the skin from free radical damage, and may also have anti-inflammatory benefits. It can help soothe the skin and is useful in products aimed at reducing irritation and redness.

**Sweet Almond Oil (Prunus amygdalus dulcis):** Sweet almond oil has softening, restorative, and moisturizing properties. Sweet almonds are known for their high emollient effect. Topical application promotes the suppleness and elasticity of the skin.

**Argan Oil (Argania spinosa):** Rich in vitamin E and phytosterols, softens and soothes the skin. Phytosterols ensure skin elasticity and thus prevent wrinkles and stretch marks. It contains 80% essential fatty acids, has antioxidant properties, prevents premature aging, and hydrates, nourishes, and regenerates the skin.

**Aloe Vera (Aloe barbadensis):** Aloe Vera is one of the most complete cosmetic-active ingredients. The power of succulents (like Aloe vera) to survive in harsh environments is due to their incredible ability to retain moisture. They are also highly anti-inflammatory, antimicrobial, and antibacterial. All these factors make succulents excellent in skincare formulas. They possess exceptional moisturizing, skin-restorative properties and are very anti-inflammatory and soothing.

**Baobab Oil (Adansonia Digitata Seed Oil):** Obtained from the seeds of the African Baobab tree, baobab oil is very nutritious for the skin, providing unsaturated fatty acids (omega 3, 6, and 9) and vitamins. It is also moisturizing, regenerating, and nourishing for the skin. Baobab oil regulates both very dry and oily skin and acts as a softening and soothing agent.

**Vitamin E (Tocopherol):** Vitamin E has many properties, but it is especially known as the vitamin of youth and beauty. It is an antioxidant that protects cells against external aggression such as pollution, pesticides, and stress, the main cause of premature aging.

**Glycerin (Glycerin):** A powerful hydrator that protects and nourishes, forming a protective layer that helps prevent moisture loss during sleep.

**Shea Butter (Butyrospermum Parkii Butter):** Is a fat obtained from the nuts of the shea tree. It is rich in fatty acids, vitamins, and minerals that can hydrate and nourish the skin. Shea butter has anti-inflammatory and antioxidant properties that can protect the skin from damage caused by free radicals and UV rays. It is often used in skincare products as a moisturizing and softening agent.

**Rosemary (Rosmarinus officinalis flower extract):** Rosemary extract offers significant anti-inflammatory and antibacterial properties thanks to the high concentration of rosmarinic acid, which is used to treat sensitive and irritated skin. On the other hand, the carnosic acid and carnosol content act as antimicrobial agents, offering protection against bacteria. Overall, this extract has remarkable antiseptic and astringent properties.

## INGREDIENTS

Aloe barbadensis Leaf Juice\*\*, Prunus amygdalus Dulcis Oil\*\*, Maltodextrin, Glycerin\*\*, Butyrospermum Parkii Butter\*\*, Cetearyl Olivatate, Sorbitan Olivatate, Adansonia Digitata Seed Oil\*\*, Opuntia ficus indica Seed Oil\*\*, Cetearyl Alcohol, Microcrystalline Cellulose, Cetyl Palmitate, Sorbitan Palmitate, Glyceryl Caprylate, Tocopherol, Xanthan Gum, Sorbitan Oleate, Glyceryl Undecylenate, Cellulose Gum, Argania spinosa kernel Oil\*\*, Rosmarinus Officinalis Leaf Oil, Aqua, Sodium Hyaluronate, Mentha piperita Oil, Copernicia Cerifera Cera, Dimethylaminoethanol Tartrate, Polysorbate-20, Retinol, Propanediol, 1,2-Hexanediol, Caprylyl Glycol, Disodium Cocoamphacetate, Helianthus Annuus Seed Oil, Squalane, Tocopherol, Glucosyl Ceramide, Pentylene Glycol, Sodium Hyaluronate, Ethyl Ferulate, Humulus Lupulus Extract, Citric Acid, Phytic Acid, Benzyl Alcohol, Potassium Sorbate, Sodium Benzoate, Limonene\*, Linalool\*.
