- 02 Toner vs essence
- 03 PHA, AHA & BHA
- 04 Hero actives
- 05 How to use & recommend
- 06 Common questions
- 07 Team cheat sheet

100 ml / €39 recommended retail price

Why an essence?

Inspired by the Korean skincare tradition, Skin Ferment Essence introduces a targeted skin-prep step within the Líkami routine. While toner prepares and rebalances the skin after cleansing, the essence goes one step further: it actively optimises the skin for serum and moisturiser.

WITHIN THE 4-STEP PROGRAM

STEP 2 - SOOTHE & TONE After Facial Toner Mist and before the targeted treatments in Step 3.

What will the client notice?

- Smoother, more refined skin texture
- More hydration & skin comfort
- A fresher, brighter glow
- Skin optimally prepared for treatment

Twee stappen. Twee duidelijke functies.

TONER

BALANCE

After cleansing. Helps restore the natural pH balance of the skin, provides comfort and forms the first preparatory step in the routine.

RESULT

Skin ready for the next step.

SKIN FERMENT ESSENCE

ACTIVATE

After toner, before serum. Refines, hydrates and actively brings the skin into optimal condition for treatment.

RESULT

Skin optimally prepared for targeted active ingredients.

HOW TO EXPLAIN IT

“Your toner helps restore the natural pH balance of the skin after cleansing. Skin Ferment Essence then goes one step further: it refines and activates the skin before your targeted serum.”

STEP 1 CLEANSE & PURIFY → STEP 2 SOOTHE & TONE → STEP 3 TREAT & TRAIN → STEP 4 NOURISH & SHIELD

What exactly is PHA?

PHA stands for polyhydroxy acid. Like AHA and BHA, it belongs to the family of exfoliating acids, but PHA is known for its particularly gentle action and additional hydrating properties.

PHA

POLYHYDROXY ACID

Gentle surface renewal + hydration. Larger molecules; generally gentler on the skin.

AHA

ALPHA HYDROXY ACID

Surface exfoliation focused on skin texture and glow. Intensity varies depending on type and concentration.

BHA

BETA HYDROXY ACID

Oil-soluble exfoliation. Particularly useful for excess sebum, blemishes and congested pores.

IN SKIN FERMENT ESSENCE

We use lactobionic acid, a PHA, for gentle daily refinement without aggressively compromising the skin barrier.

Three heroes. One intelligent prep step.

01 PHA / LACTOBIONIC ACID

GENTLE RESURFACING + HYDRATION

Helps loosen dead skin cells, refines texture and attracts moisture at the same time.

02 FERMENTED CATALYST COMPLEX®

THE CATALYST IN YOUR ROUTINE

Fermented rice extract + prebiotic inulin. Acts as a functional catalyst: helping to activate and balance the skin and bring it into optimal condition before the treatment steps that follow.

03 GREEN TEA

ANTIOXIDANT SUPPORT + SOOTHING

Rich in polyphenols; helps protect against oxidative stress and supports a calm, fresh-looking complexion.

SUPPORTING ACTIVES

Red vine leaf - antioxidant support / Liquorice root - soothing & brightening support / Magnesium chloride - skin comfort

98.85% INGREDIENTS OF NATURAL ORIGIN

Make the routine feel logical.

AT-HOME USE

01 **AM en/of PM**

After cleansing and Facial Toner Mist.

02 **± 1/3 PIPETTE**

Apply over face and neck.

03 **PRESS, DON'T RUB**

Gently press into the skin; do not rinse.

04 **FOLLOW WITH TREATMENT**

Follow with a targeted serum and moisturiser.

3 SIMPLE RECOMMENDATIONS

01 **Dull or rough skin?**

Focus on PHA for gentle refinement and glow.

02 **Skin feeling out of balance?**

Focus on ferment + prebiotic inulin.

03 **Already using a serum?**

The essence is the skin-prep step and does not replace the serum.

Keep the answers short and clear.

Is this the same as a toner?

No. Toner rebalances after cleansing; essence is the active skin-prep step that follows.

Does the essence replace my serum?

No. The essence prepares the skin; the serum remains the targeted treatment.

Is this an exfoliant?

The formula contains PHA for gentle daily resurfacing and refinement.

Can I use this every day?

Yes. The essence is designed for daily use, AM and/or PM.

How much should I use?

Approximately 1/3 of a pipette for the face and neck.

Which skin types is it suitable for?

For all skin types that benefit from greater refinement, glow and better skin preparation.

ONE-MINUTE TEAM CHEAT SHEET

Everything your team needs to know.

WHAT

Fermented skin-prep essence.

WHERE

Step 2 - Soothe & Tone. After toner, before serum.

WHY

Refines, hydrates, balances and optimises.

HEROES

PHA + Fermented Catalyst Complex® + Green Tea.

TEXTURE

Light, subtly gel-like and melts instantly into the skin.

USE

AM/PM. ± 1/3 PIPETTE. Zacht indrukken.

SIZE / RRP

100 ml / €39.

THE LINE TO REMEMBER

“Prep smarter, treat better.”
