

RECHARGE SLEEP MASK

AHAs – hyaluronic acid – niacinamide

50 ml | 1,7 fl.oz

GROUP
FACE F | 12250

PRODUCT

The Recharge Sleep Mask offers an advanced approach to nighttime skincare, combining a formula that blends hydration and exfoliation. It supports natural skin renewal during sleep, helps to reduce irregularities, and promotes a brighter complexion. Key ingredients such as hyaluronic acid, glycerin, niacinamide, and willow bark are complemented by alpha-hydroxy acids (AHAs) in a rich cream. These AHAs work overnight to exfoliate and rejuvenate the skin, contributing to a radiant and renewed appearance each morning.

BEAUTY BENEFITS

The Recharge Sleep Mask offers effective nighttime skincare by combining hydration and exfoliation. The formula, enriched with hyaluronic acid, niacinamide, and alpha-hydroxy acids (AHAs), supports the skin's natural repair process during sleep. This mask actively works to reduce skin irregularities and tone differences, resulting in a smoother and brighter complexion.

APPLICATION

For optimal performance of the Recharge Sleep Mask, start with a thoroughly cleansed face. Apply an even layer to your face and neck, avoiding the sensitive skin around the eyes. Allow the mask to work overnight. For sensitive skin or a quicker treatment, leave it on for 15-20 minutes and rinse off with lukewarm water. For additional care, you can mix it with a few drops of facial oil. Use it 1-2 times per week in the evening. In the morning, conclude with SPF for optimal protection and results.

BOTANICAL ACITVES

Vitamin B3 (Niacinamide): Niacinamide, or vitamin B3, helps in repairing DNA damage in epidermal keratinocytes and can reduce UV radiation-induced immunosuppression.

Hyaluronic Acid (Sodium Hyaluronate): This substance attracts and retains moisture in the skin, contributing to hydration and plumping of the skin. It is often referred to as a 'moisture-binding' ingredient.

Alpha Hydroxy Acids (Alpha Hydroxy Acids): Also known as AHAs. They help in unifying the skin tone, reducing the formation of wrinkles, and are ideal for dry skin due to their moisturizing property.

1. **Glycolic Acid (Glycolic Acid):** A commonly used AHA, known for its ability to exfoliate the skin, improve skin texture, and help in reducing fine lines and wrinkles.
2. **Lactic Acid (Lactic Acid):** Known for its moisturizing properties and promoting a smoother, more radiant skin.
3. **Malic Acid (Malic Acid):** An AHA found in apples that contributes to the exfoliating and skin renewing properties of the product.
4. **Tartaric Acid (Tartaric Acid):** A lesser-known AHA, derived from grapes, that helps in exfoliating and improving skin texture.
5. **Phytic Acid (Phytic Acid):** This is an alpha-hydroxy acid that helps in exfoliating and lightening the skin, as well as improving skin texture and tone.

Willow Bark (Salix Alba Bark Extract): A source of salicylic acid with a cell-regenerating effect, naturally softens the skin and provides relief and soothes the skin.

Lavender Oil (Lavandula Angustifolia Oil): Known for its skin cell regenerating properties and is widely used in treatments for acne, dehydration, and sensitive skin.

Vitamin E (Tocopherol): Vitamin E has many properties, but it is especially known as the vitamin of youth and beauty. It is an antioxidant that protects cells against external aggression such as pollution, pesticides, and stress, the main cause of premature aging.

Glycerin (Glycerin): A powerful hydrator that protects and nourishes, and forms a protective layer that helps prevent moisture loss during sleep.

Alginate (Algin): Alginate is a natural polysaccharide extracted from the cell walls of brown algae. It is often used in cosmetic and skincare products for its ability to improve texture, thicken, and act as a moisturizer. Alginate helps keep the skin hydrated and can contribute to a smooth and pleasant texture of the product.

INGREDIENTS

Aqua, Caprylic/capric Triglyceride, Glycerin**, C10-18 Triglycerides, Xanthan Gum, Glyceryl Stearate SE, Sodium Stearoyl Lactylate, Sodium Hydroxide, Niacinamide, Glycolic Acid, Lactic Acid, Glyceryl Caprylate, Tapioca Starch, Tocopheryl Acetate, Malic Acid, Tartaric Acid, Glyceryl Undecylenate, Algin, Citrus aurantium Bergamia Peel Oil, Sodium Hyaluronate, Salix Alba Bark Extract, Lavandula angustifolia Oil, Phytic Acid, Citric Acid Benzyl Alcohol, Potassium Sorbate, Sodium Benzoate, Limonene*, Linalool*, Geraniol*.
