PRODUCT

The innovative formula of the Microbiotic Cleansing Gel has been specially developed to support and balance the skin's microbiome. This pH-neutral gel delivers a powerful yet gentle cleanse for oily and acne-prone skin. The formula includes prebiotics, such as inulin and radish root extract, which stimulate the growth of beneficial bacteria, and probiotics in the form of lactobacillus ferment, which strengthen the skin's natural barrier. Centella Asiatica boosts collagen production and supports skin regeneration, while gentle exfoliants like lactic acid and citric acid refine the skin's texture, leaving it smooth and polished. The Microbiotic Cleansing Gel effectively removes impurities and excess oil without stripping or irritating the skin. The result is a refreshed, balanced, and hydrated complexion with a visibly improved tone.

BEAUTY BENEFITS

The Microbiotic Cleansing Gel offers more than just cleansing; it balances the skin's microbiome, combats acne, and controls excess oil production. The formula strengthens the skin's natural barrier, helping it become more resilient and healthier. Thanks to its combination of active ingredients, the gel refines skin texture, reduces impurities, and softens the appearance of acne scars. Soothing and hydrating properties ensure the skin remains comfortable and moisturised, without irritation or dryness. The result: a fresh, balanced complexion with a healthier, more radiant appearance.

APPLICATION

For best results, remove makeup first using the Cleansing Oil as part of a double cleansing routine. Then apply the Microbiotic Cleansing Gel to damp skin. Gently massage in circular motions to create a rich lather, avoiding the eye area. Rinse thoroughly with lukewarm water. Use the product daily, both morning and evening, to maintain optimal skin health.

BOTANICAL ACTIVES

Lactobacillus Ferment (Lactobacillus/Punica Granatum Fruit Ferment Extract): A probiotic ingredient derived from pomegranate that balances the skin's microbiome and supports healthy skin function. It contains live bacteria that contribute to a well-balanced skin flora.

Radish Ferment (Leuconostoc/Radish Root Ferment Filtrate): A prebiotic ingredient that stimulates the growth of beneficial skin bacteria. Its antimicrobial and antioxidant properties help maintain clear, calm, and healthy-looking skin.

Inulin (Inulin): A prebiotic that nourishes healthy skin bacteria, strengthens the natural skin barrier, and reduces irritation. Essential for a balanced skin microbiome.

Phytic Acid (Phytic Acid): An alpha-hydroxy acid (AHA) that gently exfoliates the skin, evens out the complexion, and refines skin texture for a radiant appearance.

Polylactic Acid (Polylactic Acid): Derived from corn starch, it gently removes dead skin cells and promotes healthy skin renewal. It refreshes the skin and supports the natural respiration of the epidermis.

Centella Asiatica & Derivatives (Centella Asiatica Extract, Asiaticoside, Madecassic Acid, Asiatic Acid): This powerful combination supports skin repair and strengthening. Centella Asiatica stimulates collagen production, promotes wound healing and cell recovery, reduces inflammation, and soothes the skin. It also provides antioxidant protection and improves the skin barrier and texture.

Cucumber Extract (Cucumis Sativus Fruit Extract): Hydrates, refreshes, and delivers a cooling effect on the skin. It reduces redness and swelling, leaving the skin calm and comfortable.

Witch Hazel (Hamamelis Virginiana Leaf Extract): Known for its astringent properties, it helps minimise pores, calm inflammation, and improve skin balance.

Aloe Vera (Aloe Barbadensis Leaf Juice): A versatile ingredient with exceptional hydrating, skin-restoring, and anti-inflammatory properties. It supports the skin barrier and soothes irritations, leaving the skin nourished and calm.

Glycerin (Glycerin): A skin-restoring ingredient that helps maintain moisture balance and prevent dryness. It works synergistically with other nourishing ingredients to keep the skin soft and hydrated.

Calendula (Calendula Officinalis Flower Extract): Stimulates the skin's natural healing process, regenerates damaged tissue, and supports collagen production. Calendula hydrates, nourishes, and soothes the skin with its anti-inflammatory and protective properties.

Chamomile Extract (Chamomilla Recutita Flower Extract): Contains soothing and decongesting properties that calm and stabilise the skin. Ideal for reducing irritation and redness.

Jojoba Oil (Simmondsia Chinensis Seed Oil): A lightweight, non-greasy emollient that softens, hydrates, and supports the skin's natural moisture balance.

Argan Oil (Argania Spinosa Kernel Oil): Rich in vitamin E and essential fatty acids, it nourishes, hydrates, and restores the skin while providing antioxidant protection against premature ageing.

Vitamin E (Tocopheryl Acetate): A powerful antioxidant that protects skin cells from external stressors such as pollution and free radicals. It helps maintain a youthful and healthy-looking complexion.

INGREDIENTS

Aqua, Aloe barbadensis Leaf Juice**, Glycerin**, Decyl Glucoside, Cocamidopropyl Betaine, Maltodextrin, Argania spinosa kernel Oil**, Inulin, Simmondsia chinensis Seed Oil**, Xanthan Gum, Citrus sinensis Peel Oil Expressed, Lactic Acid, Lactobacillus Ferment, Phytic Acid, Leuconostoc/Radish Root Ferment Filtrate, Tocopheryl Acetate, Citric Acid, Chamomilla Recutita Flower Extract**, Centella Asiatica Extract**, Calendula officinalis Flower Extract**, Cucumis sativus Fruit Extract, Hamamelis virginiana Leaf Extract, Asiaticoside, Madecassic Acid, Asiatic Acid, Benzyl Alcohol, Sodium Benzoate, Potassium Sorbate, Limonene*, Linalool*, Citral*.
