

SKIN FERMENT ESSENCE

PHA – Fermented Catalyst Complex® – Green Tea

100 ml | 3,4 fl.oz

GROUP

FACE F | 23100

PRODUCT

This high-performance fermented skin-prep essence has been developed as an activating step between toner and serum within a considered skincare routine. The formula, enriched with PHA, Fermented Catalyst Complex® and green tea, gently refines the skin, restores balance and supports the skin microbiome. Where a toner prepares the skin after cleansing, this essence goes further by actively optimising the skin for the steps that follow. Through mild resurfacing, it refines skin texture without disrupting or irritating the barrier. It enhances the absorption of subsequent serums and treatments, allowing each layer to perform more effectively. The light, subtly gel-like texture melts seamlessly into the skin, creating a comfortable first active layer. It hydrates, softens and leaves the skin feeling smoother and more even, with a refined glow. After use, the skin feels perfectly prepared, receptive and in optimal condition for the rest of your routine.

BEAUTY BENEFITS

This essence supports the skin in preparing for treatments by combining refinement, balance and comfort in one daily activating step. It helps to smooth the skin's surface, supports a healthy skin microbiome and optimises the efficiency of subsequent skincare. By combining mild resurfacing with fermented and prebiotic actives, the formula leaves the skin looking brighter, smoother and more harmonious without overloading the skin barrier. The essence is suitable for all skin types that benefit from refined texture, enhanced glow and improved product absorption. Rather than being an unnecessary extra step, it acts as a functional catalyst that strengthens and optimises the entire routine.

APPLICATION

Apply in the morning and/or evening after cleansing and toning. Dispense a few drops into the palms and gently press into the skin of the face and neck. Do not rinse. Follow with serum and moisturiser. Always combine with sun protection during the day.

BOTANICAL ACTIVES

PHA (Lactobionic acid): PHA is a polyhydroxy acid with an exceptionally gentle profile that helps refine skin texture without disrupting the skin barrier. This advanced exfoliating molecule supports mild daily resurfacing by loosening dead skin cells and smoothing the skin's surface. At the same time, it attracts and retains moisture within the skin, meaning it not only exfoliates but also hydrates. This makes PHA particularly suitable for sensitive skin types that seek refinement without tolerating aggressive exfoliation.

Fermented Catalyst Complex®

The Fermented Catalyst Complex® forms the activating core of this formula, combining fermented rice extract and prebiotic inulin in a synergistic system that helps activate, balance and optimally prepare the skin for subsequent treatments.

- **Fermented rice extract (Saccharomyces/Rice Ferment Filtrate)** is rich in amino acids and skin-nourishing components that help revitalise and support the skin. Through fermentation, valuable nutrients become more bioavailable, resulting in a smoother, brighter and more energised-looking complexion. The ferment supports the skin's natural vitality and gives the formula its characteristic fermented skin-prep action.
- **Inulin** is a prebiotic saccharide that supports the skin microbiome and helps maintain a balanced skin flora. By nourishing beneficial bacteria, it contributes to a stronger skin barrier, reduced reactivity and a complexion that is more resilient to daily external stressors.

Together, the Fermented Catalyst Complex® helps bring the skin into optimal condition prior to treatment, supports its natural balance and enhances the performance of the subsequent skincare routine.

Green tea (Camellia Sinensis Leaf Extract): Green tea is rich in polyphenols and antioxidants that help protect the skin against oxidative stress and external aggressors that can disrupt its balance. It is also known for its soothing properties and its ability to support a clear, fresh-looking complexion.

Red vine leaf extract (Vitis Vinifera Leaf Extract): Helps protect against free radicals and supports the skin's natural defence against daily stressors.

Liquorice root extract (Glycyrrhiza Glabra Root Extract): Helps to soothe redness, supports a more even complexion and contributes to a brighter-looking skin.

Magnesium Chloride: Supports skin comfort and contributes to a smooth, balanced skin feel.

INGREDIENTS

Aqua, Propanediol, Glycerin**, Lactobionic Acid, Inulin, Saccharomyces/Rice Ferment Filtrate, Magnesium Chloride, Xanthan Gum, Sodium Hydroxide, Butylene Glycol, Tocopherol, Tocopheryl Acetate, Pentyleneglycol, Camellia Sinensis Leaf Extract**, Vitis Vinifera Leaf Extract**, Glycyrrhiza Glabra Root Extract, Sodium Chloride, Potassium Chloride, Magnesium Sulphate, Ethylhexylglycerin, Calcium Chloride, Benzyl Alcohol, Potassium Sorbate, Sodium Benzoate.
