PRODUCT

Meltabalm is a biomimetic 4-in-1 hybrid balm for lips, cheeks, eyes and contours. This innovative formula blends colour and care into one compact multitasking balm. Its soft, melting texture fuses with the skin upon contact, leaving behind a subtle tint with a natural glow. The formula is enriched with skin-identical lipids like ceramide III, jojoba esters and plant-based phytowaxes, which support, hydrate and soften the skin barrier. Thanks to its biomimetic structure, the balm is highly tolerable, even for sensitive skin types. With six universally flattering tints, Meltabalm adapts effortlessly to your complexion for a fresh, radiant look: no-makeup makeup at its finest.

BEAUTY BENEFITS

Meltabalm is more than a colour product — it's care and expression in one. Thanks to biomimetic ingredients, the balm works in synergy with the skin rather than sitting on top. Ceramide III and jojoba esters help repair the skin barrier, while phytowaxes create a velvety texture and protect against dryness. The balm delivers a natural glow, is buildable in intensity and lets the skin breathe. Perfect for those who love minimal routines without compromising on efficacy or radiance.

APPLICATION

Apply MELTABALM using fingertips or a brush (such as the Likami Liquid Blender Brush). First, warm the product slightly between your fingers. Apply to lips, cheeks, eyelids or contours and blend as desired. The formula is buildable: use a single tint for a fresh flush or combine multiple for a layered look. Ideal for natural makeup with a nourishing finish.
Tip: apply over moisturiser or finish with a facial mist for extra dew.

BOTANICAL ACTIVES

Ceramide III: A biomimetic, skin-identical lipid that strengthens the skin barrier and prevents transepidermal water loss. Promotes repair, protection, and comfort.

Coconut Oil (Cocos Nucifera Oil): Coconut oil has antimicrobial and soothing properties. It helps protect the skin, leaving it soft, hydrated, and supple.

Castor Oil (Ricinus Communis Seed Oil): A valuable ally thanks to its regenerative power and rich texture. Castor oil is known for its antimicrobial and anti-inflammatory properties and is rich in fatty acids that help soften and smooth the skin.

Jojoba Oil (Simmondsia Chinensis Seed Oil): Jojoba oil provides deep hydration and softness, with a composition that closely resembles the skin's natural sebum. Its high oxidative stability makes it a popular emollient in cosmetics.

Sunflower Oil (Helianthus Annuus): Highly beneficial for dry or dehydrated skin. Its high linoleic acid content supports the synthesis of skin lipids like ceramides, reinforcing the skin barrier and giving the skin a softer, healthier appearance. Sunflower oil also has a naturally soothing effect on the skin and helps reduce signs of irritation. Clinical research has shown it to be a gentle and effective alternative to topical steroids in the care of atopic skin.

Phytowaxes (Sunflower, Acacia, Candelilla): Plant-based waxes that form a protective, smoothing film on the skin without clogging it. They soften and shield the skin in a natural, breathable way.

Vitamin E (Tocopherol): Vitamin E is known as the "vitamin of youth and beauty." It's a powerful antioxidant that protects skin cells from external stressors like pollution and UV damage — key contributors to premature skin aging.

Natural Mica: Micaceous mineral pigments that give the skin a natural pearlescent glow. They are a safe, natural alternative to microplastics and synthetic shimmer particles.

INGREDIENTS

Caprylic/Capric Triglyceride, Ricinus Communis Seed Oil**, C10-18 Triglycerides, Cera Alba**, Candelilla Cera, Cocos Nucifera Oil, Simmondsia Chinensis Seed Oil**, Mica, Helianthus Annuus Seed Oil, Jojoba Esters, Tocopheryl Acetate, Helianthus Annuus Seed Wax, Acacia Decurrens Flower Wax, Polyglycerin-3, Ceramide III, CI 77891.
