BIO-BARRIER PEELING EXFOLIANT

Lactobacillus ferment – radish – ceramide

100 ml | 3,4 fl.oz

GROUP
FACE F | 102100

PRODUCT

Transform your skin with our multi-functional peeling exfoliant, which effectively exfoliates and provides enzyme mask treatment in one easy step. This unique blend of physical, chemical, and enzymatic exfoliants works to remove dead skin cells and impurities, revealing a radiant, smooth, and rejuvenated complexion. Prebiotic and probiotic ingredients nourish and support a healthy skin microbiome, while ceramides and nourishing botanical actives provide deep hydration and reduce the appearance of dark spots. With its antioxidant-rich formula, this exfoliant also helps to combat the signs of aging, making it the ultimate solution for achieving a brighter, smoother, and more even-toned complexion.

BEAUTY BENEFITS

Reveal a radiant and smooth complexion with our multi-functional peeling exfoliant. It effectively removes dead skin cells and impurities, leaving your skin refreshed and renewed. Nourishing prebiotic and probiotic ingredients support a healthy skin microbiome, while deep hydration and reduced dark spots promote an even-toned appearance. Experience the benefits of its antioxidant-rich formula as it combats signs of aging, giving you a brighter and more youthful complexion.

APPLICATION

This versatile exfoliant suits all skin types and can be used on face and body. Massage onto wet skin for 30 seconds, avoiding eyes, to remove dead cells and impurities for a radiant complexion. For deeper exfoliation, leave on as a mask for 8-10 minutes. Rinse well and proceed with your skincare routine. Use once or twice weekly and follow with moisturizer and SPF.

BOTANICAL ACTIVES

Lactobacillus ferment (Lactobacillus/Punica Granatum Fruit Ferment Extract): A probiotic derived from pomegranate that helps to balance the skin's microbiome and promote healthy skin function. This is a probiotic ingredient, which means it contains live bacteria that can help balance the skin's microbiome.

Radish ferment (Leuconostoc/Radish Root Ferment Filtrate): This prebiotic ingredient derived from radish helps to nourish and support the growth of beneficial bacteria on the skin, which can improve the overall health and appearance of the skin. It has also antimicrobial and antioxidant properties.

Ceramide (Glucoyl Ceramide): A form of ceramide that helps to strengthen and restore the skin's natural barrier function, preventing moisture loss and improving skin hydration.

Phytic acid (Phytic Acid): An alpha-hydroxy acid that helps to exfoliate and brighten the skin, as well as improve skin texture and tone.

Ferulic acid (Ferulic Acid): A superstar antioxidant that neutralizes free radicals, helping to protect the skin from environmental stressors like UV radiation and pollution. Additionally, it stabilizes and enhances the efficacy of other antioxidants such as vitamins C and E, making it a valuable ingredient in anti-aging skincare formulations.

Polylactic Acid (Polylactic Acid): Polylactic Acid derived from corn starch gently assists in delaminating and dissolving dry and dead skin cells, leaving skin looking refreshed and revitalized. It helps the skin to breathe and encourages the proper renewal of the epidermis.

Hyaluronic acid (Sodium Hyaluronate): A humectant that attracts and retains moisture in the skin, helping to hydrate and plump the skin.

Ginger root extract (Zingiber Officinale Root Extract): Has antioxidant and anti-inflammatory properties that help to protect and soothe the skin.

Turmeric root extract (Curcuma longa Root Extract): Is rich in curcumin, a potent antioxidant and anti-inflammatory compound, making it a beneficial ingredient in skincare for calming irritation, reducing redness, and brightening the skin. It may also help to combat free radicals, thus helping to delay signs of aging like wrinkles and dark spots.

Blackcurrant leaf extract (Ribes nigrum Leaf Extract): Contains high levels of antioxidants, including flavonoids and vitamin C, which can help protect the skin from environmental stressors like pollution and UV damage. It also possesses anti-inflammatory properties, potentially reducing skin redness and inflammation, making it a beneficial ingredient for sensitive or irritated skin.

Jojoba oil (Simmondsia chinensis Seed Oil): A lightweight and non-greasy emollient that helps to soften and hydrate the skin.

Vitamin E (Tocopherol): Vitamin E has many properties, but it stands out as being known as the vitamin of youth and beauty. It is an antioxidant that protects cells from all external aggression such as pollution, pesticides and stress, the main cause of premature aging.

INGREDIENTS

Aqua, Caprylic/capric Triglyceride, Polylactic acid, Glycerin**, C10-18 Triglycerides, Xanthan Gum, Sodium Stearoyl Lactylate, Lactobacillus/ Punica Granatum Fruit Ferment Extract, Simmondsia chinensis Seed Oil**, Glyceryl Caprylate, Tapioca Starch, Tocopheryl Acetate, Citrus paradisi Peel Oil**, Glyceryl Undecylate, Algin, Sodium Hyaluronate, Zingiber Officinale Root Extract**, Leuconostoc/Radish Root Ferment Filtrate, Chamomilla Recutita Flower Extract**, Curcuma longa Root Extract, Ferulic Acid, Squalane, Ribes nigrum Leaf Extract**, Glucoyl Ceramide, Pentylene Glycol, Phytic Acid, Benzyl Alcohol, Potassium Sorbate Sodium Benzoate, Limonene*.
